ACWA STORMWATER SUMMIT – POSTER SESSION
MAY 10, 2017

To accommodate more of the great ideas we had for presentations at the ACWA Stormwater Summit, we will have a poster session again this year. All poster presentations are welcome. The posters will be set around the room in the lobby area for viewing during the pre-session coffee, at breaks, during lunch, and during the concurrent sessions. Equally welcome are small tabletop displays of your latest/favorite surface water education and outreach materials.

Specifications:
- The posters should be approximately 36” x 48” or 48” x 56”. Bring your poster on a display board or poster board (i.e., a rigid backing).
- The posters or other materials can be displayed on easels or on narrow presentation shelves (about 14” deep).
- Please notify the ACWA office, at Michaelis@oracwa.org, if you wish to participate. No poster content approval is necessary. The poster session notification deadline is May 1th to ensure that adequate space and tables are available.
- When you notify the ACWA office of your poster, please indicate if you need an easel or narrow presentation table. If you can also bring an easel, that would be helpful. Please let us know that as well.
- On the day of the Summit, please plan to arrive at Lane Community College by 8:00 am to have your poster ready by registration and coffee at 8:30 am. Posters should be removed immediately after the Summit concludes.
- If you submit a PDF of your poster or other materials to the ACWA office, we will post copies to the ACWA web site with the other Stormwater Summit presentation information.

Posters of particular interest to ACWA members include:

- New Low Impact Development projects, proven LID design guidelines, and lessons learned
- BMP effectiveness studies
- In-stream monitoring results (hydromodification, biological, chemical)
- Effective local outreach programs
- Stormwater program management tools
- Emerging stormwater treatment technologies
